SEO & Analytics Report

Polite Notice Regarding to SEO & Analytics

All SEO & analytics services are aimed at improving your search engine ranking and increase business online visibility. Our goal is to organically rank your multimedia including, but not limited to blog posts and pages, website, videos, and social media platforms to the first pages of citations and directory sites like Google, Bing, and Yahoo. Studies show first page ranking can get up to 80% more traffic than the 2nd pages rankings.

Though it's considered unethical by "Google Guidelines" to guarantee increase sales conversions, increase brand awareness, or first page ranking in search engines. The difference with Digital Media God is that we provide true transparency. Understand you are paying for a process and not a keyword search ranking. If we fail to rank your overall organic online average keyword score between 20% to 40% within the first 121 days, we will refund the 100% full amount. While we are confident in our process and have gain result for our clients, we do not know the algorithm for Google and other site citations and directories. Therefore we can never be sure what will or won't work, but still stand by our policy.
